Hello Wayne: It's been many years since we have been in contact. I hope you are doing well and SIC Technologies is prospering domestically and in China. As you may or may not be aware after a lengthy and costly legal dispute was settled a few weeks ago the current owners of Metalast Surface Technology, LLC (MST), Dean and Madylon Meiling are now required under federal court order to cease the use of the United States Patent and Trademark Office METALAST trademark, name and brand "*in any fashion or manner whatsoever*" effective June 9, 2015 (Sur/Fin 2015).

If they haven't approached you already, they likely will as they begin the arduous task of rebranding their company under its new name. Keep in mind it was the Meilings that used a slick legal maneuver to essentially confiscate a business that the Semas family founded in 1993. Don't be fooled or tricked, like my family was by their smooth talking and in the words of Madylon Meiling by their so called "Quantum Leap Thinking."

I'm reaching out to you concerning the ability for SIC Technologies to gain control of the 20-year trusted and specified METALAST brand. This business proposal would result in providing you with the ability to continue to manufacture the complete line of METALAST anodizing chemistries and dyes as you have done for more than a decade, but this time on an exclusive basis under the METALAST banner at even more favorable pricing further increasing your bottom line.

Additionally, since 1997 METALAST AA-200 has proven itself to be one of the most impressive and superior performing additives in the anodizing industry. Its ability to cut operating costs, increase productivity, reduce rejects, improve surface hardness, lubricity and Taber abrasion has been well documented by metal finishers and manufactures alike. Effective June 9th, only the Semas' or their authorized representatives will be able to offer **METALAST AA-200** to the world market. We can also discuss bringing this time-tested product to the anodizing market all while producing an impressive +/- 80% gross profit margin on a product that retails for about \$170.00 per gallon.

In summary, there exists an excellent window of opportunity for you and SIC Technologies that can be put into place **IMMEDIATELY**. Considering you already have direct access to METALAST customers it would make the transition smooth and seamless. With an existing network of METALAST distributors your ability to significantly increase market share is virtually guaranteed. If the preliminary information outlined sounds of interest kindly respond feel free to contact me at your convenience so that we can discuss the matter further.

Best Regards,
David M. Semas

Second Contact Via Email

If you would be interested in pursuing this matter further we are prepared to execute an appropriate mutual Non-Disclosure Agreement (NDA) and begin meaningful discussions on this very interesting and highly profitable business venture opportunity. Thank You.

Best Regards,
David
